Summary

2nd Year Computer Engineering undergraduate with a strong foundation in problem-solving and core computer science concepts. Experienced in building responsive web applications and working with APIs using JavaScript. Comfortable with data structures, OOP, and writing clean, modular code. Actively improving algorithmic thinking through competitive programming and hands-on projects

Education

- International Institute of Information Technology Bhubaneswar, Odisha** (2024-2028)
Bachelor of Technology in Computer Engineering | 2nd Year CGPA: **8.2/10**

Skills

Programming Languages: C, C++, JavaScript

Frontend Development: HTML, CSS, Bootstrap

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Developer Tools: Git, GitHub, VS Code

Competitive Programming: 150+ problems solved on LeetCode

Work Experience

Colx-Student Marketplace

January 2025 – March 2025

- Contributed to **testing the Colx app** – a marketplace built exclusively for student communities.
- Performed manual and exploratory testing across major features including item listing, messaging, and search functionality.
- Reported usability bugs and suggested **UX improvements** for listing and browsing flow.
- Tested and provided detailed feedback to the development team via test cases and reports.

Projects

Mehfil - Music Player

Tech Stack: HTML, CSS, JS, JioSaavn API, GSAP

- Built a responsive, feature-rich music player with live streaming using the **JioSaavn API**.
- Implemented play/pause, shuffle/repeat, dynamic playlists, mini-player mode, and audio controls.
- Designed modular UI components and implemented animations using **GSAP** to improve user experience.
- Integrated dynamic content loading, song cards, sidebar nav, and top charts display.

EduArchive | B.Tech Academic Resource Platform

Tech Stack: HTML, CSS, JavaScript, Cloudinary

- Built a scalable, student-first web application to centralize B.Tech academic and placement resources with branch, year, and semester-based architecture.
- Implemented responsive and maintainable frontend components using vanilla HTML, CSS, and JavaScript, emphasizing performance and clean UI/UX.
- Integrated Cloudinary for efficient cloud-based storage, preview, and direct download of large academic PDF files.
- Designed the project with a modular structure to support future feature expansion, content contributions, and improved search capabilities.

Positions of Responsibility

- Member – **Media Team** of Advaita'25
- Flux Society Of IIIT Bhubaneswar
Video Editor | Photographer November 2024–Present
- Placement Cell, IIIT Bhubaneswar
Design & Content Coordinator October 2025–Present
